

A dynamic splash of clear water moving from right to left across the top half of the page, with several bubbles and droplets visible.

A Proven Lagoon
Optimization
System.

BlueFrog[®]
Hybrid Aerator

The Patented BlueFrog® Technology

The Blue Frog® System Technology is an innovative, affordable, sustainable solution designed to meet wastewater treatment lagoon discharge standards. It prolongs the life of the lagoon by restoring it back to its original design capacity.

The Blue Frog® is a hybrid aerator that functions as both a mixer and passive aerator that moves water laterally through the water column, creating an entirely unique treatment process.

The Key to BlueFrog®:

- ✓ System Selects for Fast Settling Granular Sludge
- ✓ Granules are Fed Constantly, Increasing Productivity
- ✓ Solids Accumulation is Significantly Reduced
- ✓ BOD, TSS & Odors Reduced

Blue Frog® can be a stand-alone system or one that works in combination with other technologies to digest sludge and reduce BOD & TSS; eliminating costs to handle sludge.

Blue Frog's® modular design uses energy-efficient 3 Horsepower motors specifically designed for our engineered system. The reduced energy consumption saves lagoon owners thousands of dollars a year on power costs. The motors are supported with a twelve-month warranty.

The BlueFrog® Benefits:

- ✓ Reduces Dredging Costs
- ✓ Attractive Return on Investment (ROI)
- ✓ Reduces Power Consumption
- ✓ Digests Organic Sludge In-situ
- ✓ Eliminates Nuisance Odors
- ✓ Low Maintenance
